**NITROORGANIC**  
FERTILIZER

NitroOrganic is a great all natural and safe fertilizer similar to Milorganite. NitroOrganic is an all natural slow release fertilizer that will not burn. It allows your plants to take up nutrients as they grow. NitroOrganic will greatly improve the overall health and beauty of all plants, trees, and shrubs.

NitroOrganic is a safe and natural deer and rabbit deterrent. Using it in the garden will help keep them away for approximately 4-6 weeks. NitroOrganic is also great to use in food plots. Simply mix it with the seed when broadcasting. Not only will it feed your food plot, it will keep deer and other animals away for several weeks, giving the plants enough time to mature sufficiently before game animals begin feeding on the food plot.

**GUARANTEED ANALYSIS:**

Total Nitrogen (N)	4%
3.2% Water Insoluble Nitrogen	
Available Phosphate (P205)	3%
Iron (Fe)	1%

Nutrients derived from Class A Eq. Biosolid  
3.2% slowly available nitrogen from Biosolid

**SOIL AMENDING INGREDIENTS:**

Humic Acids	2%
Total Other Ingredients	98%

Humic Acids Increases the water Infiltration and water-holding capacity of the soil.
